

**ONE REPAIRMAN
FOR 31 REPUBLICS**

Sam Davis, a big coal dealer of Toledo, shows what can be done in holding down maintenance costs on motor trucks by maintaining a fleet of thirty-one Republic trucks with only one repairman.

These trucks are nearly all of three and one-half ton capacity, being the standard Republic chassis fitted with dump bodies and they are given the usual hard work that fails to a truck used in hauling coal.

Discussing these trucks, Mr. Davis says:

"The new models 18 and 20, in my opinion, are the best trucks on the market and cannot be duplicated."

These trucks operate every day and are not laid up for repair. We have only one repair man for our entire fleet of trucks. We catch our oiling and greasing and do not have much trouble."

**LIKED TRUCK SO WELL
HE BECAME DEALER**

There are many ways of getting into the automobile equipment selling business, but the experience of F. E. Silver of Carroll, Iowa, is unique.

Mr. Silver is a brother of James

leg, towns one for which he earned \$3,000 and then became a big buyer.

Some months ago he decided that a

Model H Republic truck from the Con-
signy Motor Truck company of Des
Moines.

Mr. Silver was so impressed with
the work of the Republic truck on his
farm in reducing hauling costs that
he has gone into partnership with Mr.
Cox and has taken the agency for Re-
public trucks in the territory around
Carroll.

**PARLOR, BEDROOM
AND BATH" COMING**

Theatregoers of Ottawa are looking
forward with more than usual interest
to A. H. Woods' forthcoming pro-
duction of "Parlor, Bedroom and

Bath," the famous New York farce

which has proved to be one of the most
popular farces in years.

"Parlor, Bedroom and Bath" is de-
scribed as a fresh, pleasant, farcical
farce in three acts, and is the work
of C. W. Bell and Mark Swan, who
have furnished it with one of the most
amazingly clever and original
plots seen on the stage in years. The
story has to do with the desperate at-
tempt of a mild-mannered young man
to live up to his surely fictitious
reputation as a Don Juan. His wife
is tremendously proud of his imagin-
ation.

Our Job

As the leader of a great industry, Willard is held responsible, and rightly, for storage battery improvement, for storage battery service, and for giving all necessary help and information to the great car-owning public.

To make the new Willard battery owner's task easier, in addition to our responsibility for the quality of material and workmanship, we offer to all such as properly register the new battery at a Willard Service Station, a 90-day service free of charge, with full and complete printed information on every point the owner needs to know.

The Nation-wide Willard Service Organiza-

tion was established and is maintained for the car owner's benefit, to assist him in getting a really trained service by men who know their job.

The latest of many Willard contributions to battery improvements is the Still Better Willard with Threaded Rubber Insulation—an invention which entirely does away with what was previously an almost universal battery repair expense—reinsulation. Our one objective is the car owner's complete satisfaction, and this we pledge to those who make or sell motor cars and to the millions of men and women who drive them.

Cars on Which Willard Batteries are Regular Equipment:

<i>Passenger Cars</i>
